

StemCyte Family™

It's not just about saving blood...it's about saving lives.

Choosing the right cord blood bank for your family can be confusing. At StemCyte Family* we believe you will discover a significant difference between cord blood banks in their experience to help save a life.

Below is a chart that you may print to help you compare important attributes of a cord blood bank, and see why we are a different kind of bank. We hope you find this tool helpful to complete when deciding on a bank for your baby's precious stem cells. We wish you and your family good health!

Important Questions to Ask	StemCyte Family*	Bank Name: _____	Bank Name: _____	Compare our Differences
▶ How many cord blood units have been provided for transplantation by the company's laboratories?	Over 600			We believe it is not just about saving blood, it's about saving lives. Our company has now supplied over 600 related, unrelated, and double cord units for both children and adult transplants.
▶ How may transplant hospitals have used their units?	Over 140			We have extensive experience with the world's leading transplant hospitals for over 40 different life-threatening diseases.
▶ Is the laboratory accredited by the Foundation for the Accreditation of Cellular Therapy (FACT)?**	Yes			As our laboratory also registers publicly donated units for transplant, we meet the high standards of the largest US stem cell registry as well as accreditation by FACT. Importantly, StemCyte met the FACT criteria for cord blood collection, processing, testing, banking, selection and release of units and is the only cord blood bank in the world to be accredited by FACT for autologous donations.
▶ Do they offer a product guarantee?	LifeSaver® Quality Guarantee***			StemCyte owns a separate 23,000 unit public donor bank inventory which may be able to provide a replacement unit, if ever needed.

* Our StemCyte International Cord Blood Center is a leading provider of umbilical cord blood stem cells for families needing transplants all over the world. Our transplant record includes both publicly donated and privately stored cord blood units. The same physicians, medical technologists and laboratory personnel who process, freeze, and store cord blood units for our highly accredited public bank also provide this same service for our StemCyte Family families.

** The Foundation for the Accreditation of Cellular Therapy (FACT) is a registered trademarks unrelated to StemCyte Family.
